

hp mobile professional solution

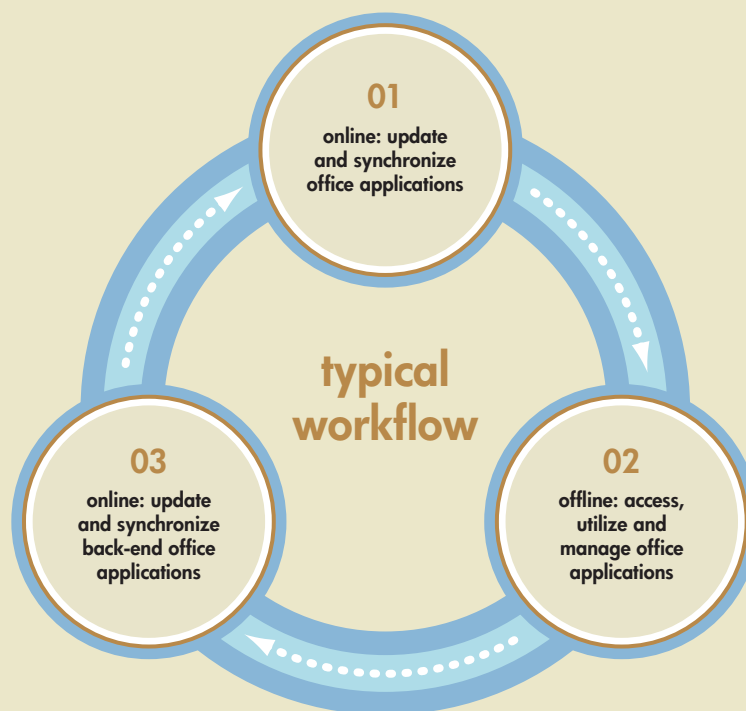

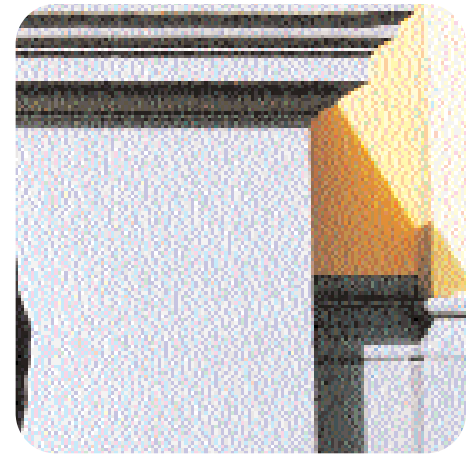

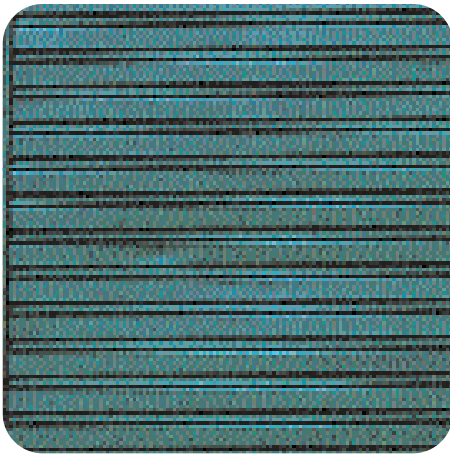

Today's mobile professionals often face the challenge of connecting wirelessly to the business data they need while on the road or at a customer site. HP's Mobile Professional Solution can help your mobile workforce be more productive by allowing them to stay connected with the office anytime, anywhere. This flexible solution provides secure wireless access from any mobile device to e-mail, intranet, contacts and corporate directory applications by leveraging existing VPN infrastructure.

HP's Mobile Professional Solution is ideally suited for those companies that need a low-risk solution. It can be initially deployed in a small pilot configuration to demonstrate the return on investment (ROI) by wirelessly enabling your mobile professionals, with the capability to scale up when you are ready to expand the program.

- role base selector provides access to applications to support specific job roles
- secure wireless VPN
- integrated to messaging servers (such as Microsoft Exchange, Lotus Domino)
- access Internet/intranet sites
- access corporate phone listings and directory services
- receive SMS alerts
- connect real time to business data and applications (online mode)
- work offline and synchronize data and applications as required

what is included in the solution

HP and partners can help you rapidly deploy a scalable mobile professional solution that closely connects your mobile workforce to the office. The end-to-end solution combines the following:

- mobile devices (HP iPAQ or any PDA or laptop)
- infrastructure for your always-on business:
 - HP-UX, Linux®, or Windows® servers
 - HP storage products
 - HP OpenView management solutions
 - HP security solutions
- best-of-breed partner applications
- business and IT consulting services
- mobile front-end installation services
- enterprise application integration services
- network operator data services
- HP mission-critical support services

business benefits

- improve productivity, maximize investments by leveraging existing VPN infrastructure
- minimize change management by enabling staff to be mobile and connected

company staff can now:

- read and respond to e-mail while out of the office
- access mobile-enabled corporate web applications
- find company contacts more efficiently
- reduce travel time by accessing corporate applications remotely

features

mail server connectivity:

- Microsoft Exchange (5.5/2000)
- Lotus Domino (4.5/4.6/R5)

device connectivity:

- support Windows CE, Palm OS, Windows 98/NT/2000
- ability to work online and offline with synchronization services
- receive automatically pushed SMS alerts

intranet access:

- connect to company intranet via secure VPN/IPsec tunneling
- access to web-based applications through Pocket Internet Explorer
- access to corporate directory application via intranet-enabled application or HP's Instant Contact

PIM applications:

- provides access to calendar, contacts, and tasks

access/security:

- connect to wireless (public and private) and wireline networks
- support application layer (SecurID/embedded encryption), transport layer (SSL/PKI/WTLS), and network layer (VPN/IPsec)
